FIRST-ROUND PROPOSAL

2026 · MALAYSIA · VIETNAM · SINGAPORE

Chain*Sight*

A supply-chain trust layer *that turns 4,000 small chip suppliers in Penang into real-time, audit-ready partners for the world's biggest chip makers — riding on cables and subsidiaries that only CHT owns.*

THE GAP

82%

small suppliers still on excel

REACHABLE MARKET

$1.2*B*

se asia chip corridor

YEAR-3 REVENUE

$4.2*M*

64% recurring · scales to $24m

CLIENT RETURN

3.2×

payback on subscription

12 chapters in 3 parts — the *five core chapters* (market · product · business · moat · financials) are set in orange.

The whole deck on one page — *orange* marks the five core chapters.

Three parts: why now (market), what we build (product & model), why CHT wins and what it costs to get there. Five chapters — market, product, business model, moat, financials — are coloured **orange** *for reviewers who want to skim the argument in five slides.*

● CORE CHAPTER (MARKET / PRODUCT / BUSINESS / MOAT / FINANCIALS) ● CONTEXT & EXECUTION CHAPTER

PART A · WHY NOW

An order *gap* in progress

01. **Executive Summary** — Penang's 4,000 suppliers invisible in real time

02. **Problem** — 82% still on Excel, 48h to answer a capacity question

03. **Market & Moat** — $1.2B corridor + head-to-head competitor matrix

PART B · WHAT WE BUILD

The *product* & model

04. **Product / Solution** — Pulse · Predict · Comply, three AI agents

05. **Technical Architecture** — $240 edge box, data stays on site, CHT cable

06. **Business Model** — fabs pay, SMEs free, two-sided network

PART C · WHY CHT WINS

Moat, *financials*, execution

07. **CHT Moat** — cables + Malaysia subsidiary + ASE reference

08. **Financials** — break-even Year 3 Q4, $24M by Year 5

09–12. **Roadmap, Risks, Impact, Ask** — 18 months, $3M, 4 phases + risk register

CHAPTER NUMBERS MAP TO THE TOP-LEFT CH.XX TAG ON EVERY SLIDE · ORANGE TEXT MARKS THE FIVE CORE CHAPTERS (MARKET · PRODUCT · BUSINESS · MOAT · FINANCIALS)

Turn Penang's 4,000 suppliers into *real-time, audit-ready* partners for the fabs.

THE ONE-SLIDE STORY

When Intel asks a Penang supplier "what's your real capacity?", the answer takes *48 hours*. By then, the order has already gone to Vietnam.

Penang hosts 4,000 small chip-packaging suppliers serving Intel, ASE, Infineon and Inari — yet 82% still run on Excel and phone calls. Tier-one factories have no real-time view of supplier capacity or compliance. ChainSight closes that gap in under two seconds, across a data pipe that only CHT owns.

i.

A gap worth fixing

Malaysia just pulled in **$15 billion** of new chip capex (Intel, Infineon, ASE). The factories are being built. But their **supplier visibility is still run on Excel**, and every missed order quietly migrates to Vietnam.

ii.

A fix that works

Three AI helpers on one dashboard: **Pulse** watches the shop floor, **Predict** warns 7–14 days early, **Comply** turns two months of audits into one click. Big clients pay; small suppliers join free.

iii.

Only CHT can ship it

No one else owns all three: **14 undersea cables** into Malaysia, a **brand-new Malaysia subsidiary** (Dec 2025), and a **proven smart-factory reference** already running at ASE. Competitors have at most one.

A 48-hour data gap — one missed PO at a time, *orders bleed to Vietnam*.

THE 48-HOUR DATA GAP

82%

of Penang's chip suppliers still track production with **Excel and a phone**. *Not sensors. Not dashboards. Excel.*

Source · MIDA & MIDF Research 2024

WHAT THIS COSTS TAIWAN

A $15 billion factory boom *is colliding with* an Excel-era supply base.

*48*h

TYPICAL FAB RESPONSE TIME TO THE QUESTION **"WHAT'S YOUR REAL CAPACITY TODAY?"** A SINGLE MISSED ORDER COSTS ≈ $250K.

$15*B*+

FRESH FACTORY CAPEX LANDING IN MALAYSIA: **INTEL $7B · INFINEON €5B · INARI · ASE** — ALL HUNTING FOR SUPPLIERS THEY CAN ACTUALLY SEE.

55*K*

ENGINEER SHORTFALL: MALAYSIA NEEDS 60K, PRODUCES 5K A YEAR. **AI IS THE ONLY WAY TO CLOSE THIS GAP.**

WHY NOW · MALAYSIA'S NEW FACTORY LAW (NIMP 2030) + DATA PRIVACY ACT (PDPA 2025) + CHT MALAYSIA SUBSIDIARY OPENED DEC 2025 — THE WINDOW IS 2025 TO 2027

A $1.2B Southeast Asia corridor — *nobody else has wired it*.

MARKET SIZE & THE MOAT NO ONE ELSE HAS

A *$1.2 billion* corridor nobody else has wired.

We are not competing for the global $41B cloud market — we are building the only data pipe that actually reaches the small suppliers of Southeast Asia.

TOTAL
$41–65B GLOBAL AI SUPPLY-CHAIN · 2030

REACH
$1.2B SE ASIA CHIP CLUSTER

OUR TAKE
$4.2M YEAR 3 · PENANG FIRST

*Growing **18.5% a year** — 3× the global average. Every 1% more of Penang wired unlocks another $12M in annual revenue.*

WHO'S PLAYING	REACHES SMALL SUPPLIERS?	OWNS THE DATA PIPE?	TAIWAN TRUST LAYER?
SAP / Siemens	× BIG CLIENTS ONLY	× CLOUD-DEPENDENT	×
AWS / Azure	× SELF-SERVE ONLY	× HYPERSCALER	×
Singtel / NTT	×	✓ SINGAPORE ONLY	×
FarEasTone / Taiwan Mobile	×	× no SE ASIA	— TAIWAN ONLY
ChainSight (CHT)	✓ SUBSIDISED FREE	✓ 14 CABLES	✓ BUILT-IN

SOURCES · GRAND VIEW RESEARCH 2024 · MCKINSEY SE ASIA DIGITAL 2024 · MIDA · SEMI · MIDF 2024

Three AI helpers, one dashboard — the shop floor becomes *one live signal*.

THREE HELPERS, ONE DASHBOARD

Three AI helpers that turn a factory floor into a *live signal* — in plain English.

No acronyms. No rip-and-replace. A $240 box plugs into whatever PLCs and cameras the supplier already owns, and within 72 hours the big client can see them in real time.

01 · WATCHES

Pulse.

Live machine status, live yield, live delivery ETA — refreshed every second.

A SMALL COMPUTER AT EACH SUPPLIER **WATCHES THE MACHINES**. IT CLASSIFIES EVERY SECOND AS RUNNING, IDLE, FAULTED, OR IN MAINTENANCE. THE BIG CLIENT SEES ONE TILE PER SUPPLIER: "LINE 3 AT 87%, ORDER #4471 ON TIME FOR MONDAY 14:00."

< 2 s FROM FACTORY FLOOR TO FAB DASHBOARD

02 · WARNS

Predict.

Machine failures spotted 7 to 14 days before they happen — so orders don't miss their deadline.

THE SAME DATA FEEDS AN AI THAT HAS **ALREADY LEARNED FROM THREE YEARS OF ASE TAIWAN PRODUCTION**. IT FLAGS A MACHINE LIKELY TO BREAK NEXT WEEK, AND A MATERIAL LIKELY TO RUN OUT, BEFORE ANYONE IN THE FACTORY NOTICES.

85% EARLY-WARNING ACCURACY TARGET

03 · PROVES

Comply.

Two months of audit work compressed into a single click, across three different laws.

AN AI TRAINED ON REAL AUDIT REPORTS **WRITES THE PAPERWORK FOR YOU**: MALAYSIA'S NEW PRIVACY ACT, THE RESPONSIBLE-BUSINESS AUDIT, EUROPE'S SUPPLY-CHAIN DISCLOSURE LAW. ONE CLICK, ONE AUDIT-READY PDF, BILINGUAL.

1 click REPLACES 240 HOURS OF MANUAL WORK

AI IS ESSENTIAL BECAUSE MALAYSIA IS SHORT 55,000 ENGINEERS — AUTOMATION IS THE ONLY WAY TO CLOSE THE GAP

$240 edge box · raw data stays on site · rides *CHT's own cables* back to Taiwan.

BUILT FOR THE TROPICS, BUILT FOR THE LAW

A *$240 box*. Five steps. Your data never leaves the factory.

Designed around Southeast Asia's three hardest constraints — tropical heat, blocked 5G spectrum, Malaysia's new privacy law — not a generic cloud template.

01. A small rugged computer
an **$240 INDUSTRIAL BOX** (NVIDIA JETSON) WITH WI-FI 6, MOBILE BACKUP, AND AN IP65 CASE THAT HANDLES 40°C + HUMIDITY. PLUGS INTO THE SENSORS THE SUPPLIER ALREADY OWNS.

02. AI runs on the factory floor
PULSE AND PREDICT RUN **INSIDE THE FACTORY, NOT IN THE CLOUD**. RAW YIELD DATA, MACHINE IMAGES, OPERATOR LOGS — NONE OF IT EVER CROSSES THE FACTORY WALL.

03. Only summary numbers travel
THE BOX SENDS A SMALL ENCRYPTED PACKET (LESS THAN 2 KB) WITH STATUS CODES AND KPIS. EVERYTHING ELSE STAYS ON THE SUPPLIER'S PREMISES.

04. CHT's own pipes carry it
THE PACKET TRAVELS OVER **CHT'S PRIVATE NETWORK**, THEN A **CHT-OWNED UNDERSEA CABLE** TO TAIWAN — NOT AWS, NOT AZURE, NOT A CHINESE LINK.

05. Fab sees a live tile
THE BIG CLIENT OPENS A DASHBOARD IN CHT'S OWN TAIWAN DATA CENTRE. BACKED BY THE SAME SECURITY TEAM THAT PROTECTS TAIWAN'S GOVERNMENT SYSTEMS.

THE SE ASIA CONSTRAINTS WE DESIGNED AROUND

Three things *no generic cloud can solve.*

1 · NO PRIVATE 5G. MALAYSIA'S REGULATOR GAVE 5G RIGHTS TO A SINGLE LOCAL BODY, AND FOREIGN OPERATORS CAN'T GET SPECTRUM. SO WE BUILT THE BASE LAYER ON **WI-FI 6** — IT WORKS, IT'S CHEAP, IT'S LEGAL EVERYWHERE IN THE REGION.

2 · DATA PRIVACY FINES HIT IN JUNE 2025. MALAYSIA'S NEW LAW MEANS A €1M-EQUIVALENT PENALTY FOR ANY RAW PRODUCTION DATA THAT LEAVES THE FACTORY. OUR ANSWER: NOTHING LEAVES EXCEPT SUMMARY KPIS.

3 · TROPICAL CONDITIONS. THE HARDWARE IS SEALED FOR 40°C + 85% HUMIDITY, HAS BACKUP POWER, AND KEEPS WORKING FOR UP TO 72 HOURS IF THE CONNECTION DROPS.

MY PRIVACY ACT 2025 · MY CYBER ACT 2024 · NIMP 2030 · EU CSRD · RBA AUDIT 7.0 · VN · WI-FI ONLY

EVERY TECH CHOICE TRACES BACK TO A REAL SE ASIA CONSTRAINT — TROPICAL CLIMATE, BLOCKED 5G SPECTRUM, MALAYSIAN PRIVACY LAW, OR TAIWAN SUPPLY-CHAIN POLICY

Fabs pay. Suppliers onboard *free*. A two-sided network only CHT can seed.

HOW MONEY FLOWS

Big clients pay. Small suppliers deploy *free.*

Fabs pay a monthly seat fee for supplier visibility. That subsidises free installation for the small suppliers. Every new fab contract onboards 20–40 more suppliers. The network gets denser. The pipe gets stickier.

SIDE A · PAYS

Big chip makers.

$5–15K PER FACTORY PER MONTH

→ INTEL MALAYSIA, ASE, INFINEON KULIM, INARI

→ SEAT TIER SCALES WITH NUMBER OF SUPPLIERS WATCHED

→ ENTERPRISE PLAN ADDS THE AUTOMATIC AUDIT REPORT

SIDE B · FREE

Small suppliers.

$0 UPFRONT · HARDWARE LEASE BUNDLED

→ SUPPLIER ONLY PAYS AFTER WINNING A NEW ORDER THROUGH THE PLATFORM

→ CHT PROVIDES THE BOX ON A 2-YEAR LEASE, RECOVERED FROM FAB FEES

→ SUCCESS MODEL: 3% OF NEW REVENUE UNLOCKED

UNIT ECONOMICS · PER SUPPLIER PER YEAR

FAB-SIDE SHARE	$3,600
SUPPLIER SUCCESS FEE	$1,200
HARDWARE LEASE	−$600
CLOUD & SUPPORT	−$1,200
SALES & PARTNER	−$540

$2,460

NET CONTRIBUTION · 51% GROSS MARGIN

PAYBACK PER SUPPLIER 7.4 MONTHS · LTV / CAC ≈ 4.8× · GROSS MARGIN SCALES TO 66% BY YEAR 5 AS CLOUD COSTS SPREAD ACROSS 260 SUPPLIERS

Cables + Malaysia subsidiary + ASE reference — *only CHT holds all three at once*.

THE CASE FOR CHUNGHWA TELECOM

This is CHT's game *to win* — and nobody else's to play.

Every Taiwanese telecom has some of the parts. Only CHT has all three. Here are the pillars ChainSight weaponises.

i.

14 undersea cables into SE Asia

CHT OWNS OR CO-OWNS MORE INTERNATIONAL CABLES LANDING IN MALAYSIA, SINGAPORE AND VIETNAM THAN **ANY OTHER TAIWANESE COMPANY**. THAT PIPE IS OUR TRUST LAYER — A ROUTE FROM A PENANG FACTORY TO A TAIWANESE HQ THAT GOES THROUGH NEITHER CHINA NOR THE US.

Used as the backbone under every ChainSight data packet

ii.

A Malaysia subsidiary opened December 2025

CHT MALAYSIA SDN. BHD. IS LESS THAN SIX MONTHS OLD. IT IS THE **FIRST TAIWANESE TELECOM** WITH A LEGAL VEHICLE TO SELL, BILL, SUPPORT AND EMPLOY ON THE GROUND IN PENANG. NOTHING ON THE PLAN WORKS WITHOUT IT — AND NOBODY ELSE HAS IT.

Used as the local business vehicle + field engineering team

iii.

A smart-factory reference already running at ASE

CHT ALREADY OPERATES A PRIVATE 5G NETWORK, AGV FLEET AND AOI CAMERA STACK AT **ASE TAIWAN**. ASE IS ALSO PENANG'S LARGEST CHIP-PACKAGING PLANT. PHASE 1 OF CHAINSIGHT IS A **TRANSFER**, NOT A NEW SALE.

Used as the Year-1 anchor customer — zero sales cycle

REVENUE BACK TO CHT GROUP · $4.2M YEAR 3 → $24M YEAR 5 · EVERY DOLLAR IS ALSO A CHT CONNECTIVITY + SECURITY + DATA-CENTRE DOLLAR. ZERO CANNIBALISATION.

Break even Year 3 Q4 · *$24M revenue · 66% gross margin* **by Year 5.**

FIVE-YEAR OUTLOOK · CONSERVATIVE BASE CASE

Break even Year 3. *$24M* by Year 5.

No government grants. No 5G spectrum. No subsidies. Pure base case — and still profitable.

$USD MILLION	Y1	Y2	Y3	Y4	Y5
Small suppliers	3	30	80	160	260
Fab dashboards	1	3	5	8	12
Total revenue	**0.28**	**1.30**	**4.20**	**10.8**	**24.0**
Cost of delivery	−0.35	−0.78	−1.68	−4.10	−8.16
Gross margin	—	40%	60%	62%	66%
Operating costs	−0.55	−0.92	−1.60	−3.10	−5.40
Operating profit	**−0.62**	**−0.40**	**+0.92**	**+3.60**	**+10.4**

BREAK-EVEN

Year *3* Q4

AFTER CUMULATIVE INVESTMENT OF $3.4M. CASH BREAK-EVEN SIX MONTHS LATER.

YEAR-5 MARGIN

66% GM

SPREAD ACROSS 260 SUPPLIERS. SUPPLIER SUCCESS FEES ARE NEAR-ZERO MARGINAL COST.

KEY ASSUMPTIONS

- ASE PENANG CONFIRMED AS YEAR-1 ANCHOR
- $10K AVERAGE MONTHLY FAB FEE (MID OF $5–15K BAND)
- SUPPLIER CHURN ≤ 8% A YEAR
- VIETNAM BEGINS YEAR 3 VIA VIETTEL PARTNERSHIP

UPSIDE NOT MODELLED · NIMP GRANT POTENTIAL ~$1.5M · COMPLY PREMIUM PRICING · VIETNAM RAMP ACCELERATION

$3M · 18 months · 4 phases — *Phase 1 is a reference transfer, not a new sale*.

18 MONTHS · 4 PHASES · 1 ANCHOR ALREADY IN HAND

$3 million. 18 months. Phase 1 is a *transfer*, not a sale.

The anchor customer — ASE — is already a CHT customer in Taiwan. We are not selling into a new relationship; we are extending an existing one across the Strait.

PHASE 01 · MONTHS 1–6

Anchor & *Pulse*

$900K · Penang

SHIP PULSE ON 3 ASE-PENANG SUPPLIERS. STAND UP THE FAB PORTAL FOR ASE. **TEAM OF 12**, HALF IN TAIPEI, HALF IN PENANG.

→ 3 suppliers live. Under 2 s latency. ASE contract signed.

PHASE 02 · MONTHS 7–12

Predict & *scale*

$1.2M · Penang + Kulim

LAUNCH PREDICT. SIGN INTEL MALAYSIA OR INFINEON AS THE SECOND ANCHOR. SCALE THE SUPPLIER BASE TO **30**.

→ 30 suppliers. 85% prediction accuracy. $1.2M annual revenue.

PHASE 03 · MONTHS 13–18

Comply & *Penang*

$900K · Penang full

SHIP COMPLY. 5 FAB DASHBOARDS LIVE, **80 SUPPLIERS ONBOARDED**. BREAK-EVEN ACHIEVED; SELF-FUNDED FROM HERE ON.

→ 80 suppliers. 5 fabs. $4.2M annual revenue.

PHASE 04 · MONTHS 19–30

Vietnam & *Singapore*

Self-funded

REPLICATE THE PLAYBOOK VIA THE VIETTEL PARTNERSHIP (AMKOR, HANA MICRON) AND SINGAPORE LIGHTHOUSE ACCOUNTS (GLOBALFOUNDRIES, MICRON).

→ $10.8M annual revenue. 3-country footprint.

TEAM GROWTH 12 → 20 → 32 FTE · HARDWARE CAPEX $420K CUMULATIVE · $3M TOTAL 18-MONTH INVESTMENT

Five material risks with *named owners* and mitigations already scheduled in the 18-month plan.

MATERIAL RISKS AND MITIGATIONS

Five material risks, *each with a planned mitigation.*

The five risks below span regulation, customer value, technology, and integration. Each has a named owner and a concrete mitigation already scheduled in the 18-month plan.

5G spectrum	MALAYSIA'S REGULATOR GAVE 5G RIGHTS TO A SINGLE LOCAL BODY. **FOREIGN OPERATORS CANNOT GET SPECTRUM.** A "5G SMART FACTORY" STORY WOULD BE DEAD ON ARRIVAL.	**WI-FI 6 IS THE BASE LAYER.** 5G IS AN OPTIONAL UPGRADE VIA A LOCAL PARTNERSHIP WITH CELCOM. NOTHING IN THE PRODUCT DEPENDS ON CHT OWNING MALAYSIAN SPECTRUM.
Data privacy	MALAYSIA'S NEW PRIVACY ACT (JUNE 2025) MAKES RAW PRODUCTION DATA LEAVING THE FACTORY A **SEVEN-FIGURE FINE**. CHIP-MAKER NDAS ARE EVEN STRICTER.	**RAW DATA NEVER LEAVES THE PLANT.** ONLY ANONYMISED SUMMARY NUMBERS TRAVEL — AND ONLY OVER CHT'S OWN CABLES. WE APPOINTED A DATA-PROTECTION OFFICER IN THE MALAYSIA SUBSIDIARY FROM DAY ONE.
Why pay	WILL A BIG CHIP FACTORY ACTUALLY PAY $5–15K A MONTH? THE PROCUREMENT TEAM NEEDS A NUMBER THAT CLEARS THE HURDLE RATE.	**3.2× RETURN.** FOUR MISSED ORDERS A YEAR × $250K EACH = $1M OF LOSS AVOIDED. SUBSCRIPTION IS $120K A YEAR. THE MATH CLEARS PROCUREMENT ON THE FIRST PASS.
AI cold-start	A BRAND-NEW SUPPLIER HAS NO HISTORICAL DATA. HOW DOES THE AI WORK ON DAY ONE?	**WE PRE-TRAINED ON THREE YEARS OF ASE TAIWAN DATA** — 18 MILLION LABELLED EVENTS. A NEW SUPPLIER WARMS UP IN 72 HOURS ON THAT MODEL AND FINE-TUNES ON LOCAL DATA AFTER 30 DAYS.
ERP integration	CONNECTING TO SAP OR ORACLE IS SLOW, EXPENSIVE, AND THE TALENT IS SCARCE. A BIG CHUNK OF THE BUDGET COULD DISAPPEAR THERE.	**PHASE 1–3 DOES NOT TOUCH ERP.** WE READ DIRECTLY FROM THE FACTORY-FLOOR CONTROLLERS. ERP CONNECTORS ARE A PHASE 5 UPSELL THROUGH SYSTEM-INTEGRATOR PARTNERS.

THE FULL RISK REGISTER IS MAINTAINED JOINTLY BY CHT MALAYSIA'S DPO AND THE CHAINSIGHT OPERATIONS LEAD, REVIEWED EVERY QUARTER

Same playbook, copied *across the Southeast Asia corridor* **— $24M by Year 5.**

BEYOND REVENUE — STRATEGIC OUTCOMES

One playbook, replicated across *Southeast Asia's* chip corridor.

Every additional market reuses the same three AI helpers, the same CHT data pipe, the same pricing model. The third market onboards 70% cheaper than the first.

01. For the suppliers

EVERY SUPPLIER THAT JOINS SEES **12% MORE MACHINE UPTIME**, **HALF THE UNPLANNED STOPS**, **30–40% OF INVENTORY CASH FREED UP**, AND ACCESS TO BIGGER ORDERS THROUGH FAB VISIBILITY. HARDWARE IS FREE — NO CAPITAL BARRIER.

02. For the big chip makers

EACH FAB GAINS **REAL-TIME VISIBILITY ACROSS ITS ENTIRE SUPPLIER BASE**, REPLACING 48-HOUR PHONE TREES WITH LIVE DASHBOARDS. 3.2× RETURN ON SUBSCRIPTION. EU SUPPLY-CHAIN REPORTING BECOMES DEFENSIBLE AND AUDITABLE.

03. For CHT and Taiwan

CHT BECOMES THE **DE-FACTO TRUST LAYER** FOR TAIWAN'S OVERSEAS SUPPLY CHAINS — AN ECONOMIC-SECURITY ASSET. LOCKS TAIWAN'S CHIP PACKAGERS (ASE, POWERTECH, KYEC, CHIPMOS) INTO CHT-MANAGED CONNECTIVITY FOR A DECADE.

THE EXPANSION PATH

Penang → Kedah → Johor → Hanoi → HCMC → Singapore → Thailand

Same three AI helpers. Same CHT pipe. Same pricing. **The third market onboards 70% cheaper than the first**, *because the hardware SKU, the security playbook, and the models are already productised.*

$24M · 260 suppliers · 12 fabs

YEAR-5 TARGET · 3-COUNTRY FOOTPRINT · 66% GROSS MARGIN

LONG-TERM OPTION VALUE · SAME PLATFORM CAN EXTEND TO EV BATTERY SUPPLY CHAINS (THAILAND, INDONESIA) AND PHARMA CONTRACT MANUFACTURERS (SINGAPORE)

$3M · 18 months · one green light — *we already have the pipe and the customer*.

THE ASK

$3 million. *18 months.* One green light.

ChainSight turns CHT's cables, Malaysia subsidiary, Viettel partnership, and ASE reference into the only credible data trust layer *for Taiwan's relocating chip supply chain. We already own the pipe. We already have the customer. We just need the word "go."*

INNOVATION

A two-sided AI business model sitting on a telecom moat. *No Taiwanese or global competitor has all three layers.*

FEASIBILITY

ASE is already a CHT customer in Taiwan. Phase 1 is a transfer, *not a new sale.*

IMPACT

$24M annual revenue by Year 5, *securing Taiwan's chip supply chain under CHT's own pipe.*
